

**Gunsmith Installation Notes:
Best Damn Gun, LLC
SIG P-Series Drop-In Kit Installation**

Reference Firearm Safety Manual for dismantling firearm.

Never work on a loaded firearm. Insure the pistol is unloaded before installing this trigger kit. Keep the pistol pointed in a safe direction at all times.

Package includes:

Sear

Safety Lever

Adjustable Trigger with Set Screw, will require adjustment explained below

Main Spring, will need to be cut to length depending upon model, use existing spring as reference

Hammer with pin

- ➔ **Product is intended for installation by a gunsmith or qualified armorer.**
- ➔ **Due to variations in P-Series Models, Main Spring is provided longer than needed. After removing original Main Spring, use uncompressed spring as model and cut new lighter mainspring to same length.**
- ➔ **Suggested trigger adjustment: Turn down clockwise until single action doesn't release, then back off approximate 1/4 turn counter-clockwise until single action hammer releases, using 5/64 hex wrench. Hammer must release freely. To make adjustment permanent a small drop of penetrating thread locker is recommended.**

BEST DAMN GUN, LLC DISCLAIMER

This trigger kit must be installed by a qualified gunsmith. If installed incorrectly, injury or even death could occur. All safeties must be checked for proper function after installation.
